

Curated by Anthony Buccino

Many of these Nutley, New Jersey, locations have been gone for generations. A few would appear in some more recent memories by those of us walking these tree-lined streets.

The Nutley Historical Society is dedicated to serve the educational, cultural, and historical needs of our community. That would include keeping a door open to our past structures and other sights that may no longer exist but played a part in making Nutley what it is today.

Here, we offer a brief glimpse of twenty-five Nutley sights you can no longer see.

Annie Oakley's house

Home in Nutley, New Jersey, formerly 300 Grant Ave.

Camp Nutley Anti-Aircraft Battery

Camp Nutley Anti Aircraft Battery, Park Avenue, Nutley NJ

Former site of Battery A of the 98th AAA Gun Battalion,
locally known as

“CAMP NUTLEY”

An active duty US Army Military Camp from 1952-1957.
Its Four Radar Controlled 90mm Guns were tasked to
defend the George Washington Bridge from Aerial Attack.

Dedicated to the Men who served here.

ITT Research Tower 1947 - 1996

Photo by John Payne

We present here a selection of photographs of the Tower's last moments, contributed by ITT employees, witnessing the event from diverse vantage points.

Photo by Barbara Heath

Thursday, April 4, 1996
10:07 a.m.

After almost 25 years of service as a research platform and 50 years as a New Jersey landmark, the dismantling of the ITT Research Tower marks a new era.

It is a sign of progress . . . where advanced technologies now permit research to be conducted in the lab or as computer models rather than in large structures such as the Research Tower.

We honor the work and dedication of all of the people who built the Tower, pursued important technologies and products and helped ITT become a vital part of America's defense.

Military Hall Tavern

Old Military Hall

A Former Landmark — A bulldozer in the upper right portion of this photograph is almost hidden by the dust left when the final walls of the Military Hall came crashing to the ground last Thursday afternoon. The structure was built by New Jersey's earliest settlers before the American Revolution.
